Your Citizen Voice
Greater Govan

What is it...

We're making decisions on how Glasgow's Neighbourhood Infrastructure Improvement Fund should be spent in your area based on the opinions of as many people as possible.

The fund makes £1 million available for infrastructure improvements such as improving open spaces, spaces for leisure and play, street furniture and street lighting, road safety and crossings, the condition of roads and pavements as well as water management and drainage systems.

What we did so far...

We co-designed the system and the methods with...

We tested this system with local partners in Calton and Greater Pollok where local people submitted over 700 ideas in only 3 weeks, a further 884 voted for the ideas they wanted to see in their area and 41 new ideas are going ahead to be funded.

What's happening just now...

We are currently making connections and building relationships with local groups and partners to ensure we are set up properly and can reach as many local people as possible. We are making sure we are building on existing networks and previous work and consultations undertaken. In the next couple of weeks we will run sessions with local partners to share the voting materials, train and support those who want to run engagements themselves and record opportunities to engage.

1. People submit ideas & priorities
2. Area Partnership assess & request costs
3. The council costs ideas
4. Area Partnership review ideas
5. People vote on ideas
6. Area Partnership make final decision
