Local Authority/Workstream Analysis

The visual below shows the percentage of all engagements for each local authority broken down by the workstream with which they are engaging. This is largely impacted by the nature of the work, with LEI activities typically longer and more in-depth which has an impact on the overall numbers who could potentially engage. The data below highlights that work in the Curriculum, Learning, Teaching and Assessment workstream is most popular for all local authorities. This is followed by the Wellbeing for Learning workstream in each local authority.

Aug 23 to Jan 24

Local Authority and Participant Representativeness

The table below provides an overview of how West Partnership event sign ups compare to the actual distribution of practitioners across our 8 local authorities. Glasgow City Council is our biggest local authority, with 30% of all West Partnership practitioners. Glasgow practitioners make up 27% of all sign ups. Glasgow is also the biggest contributor of practitioners in LEI and WFL activities. South Lanarkshire is the authority which provides most participants in CLTA related work. Most local authorities engage with the West Partnership at a level which is representative to their population. Two outliers to this exist in South Lanarkshire and North Lanarkshire. North Lanarkshire is under-represented in WP activity (19% actual to 13% sign ups), whilst South Lanarkshire is over-represented (18% actual but 25% sign ups).

Local Authority	1. Actual Population	2. WP Total	3. CLTA	4. LEI	5. WFL
East Dunbartonshire	7%	8%	10%	8%	5%
East Renfrewshire	7%	8%	7%	11%	8%
Glasgow	30%	27%	23%	22%	34%
Inverclyde	4%	5%	5%	7%	4%
North Lanarkshire	19%	13%	15%	14%	11%
Renfrewshire	9%	10%	10%	14%	10%
South Lanarkshire	18%	25%	26%	15%	23%
West Dunbartonshire	5%	4%	3%	9%	4%

17%

Minimum Engagement Level

25%

Predicted Engagement Level

From our sign up data, we can say with 100% confidence that West Partnership activity has engaged with at least 17% of all practitioners in our region. Some of our activity has involved engaging with a known number of practitioners without knowing their specific names - for example when a moderation event occurs with all staff from one establishment. Our predicted engagement level takes account of this and applies the rate of non-unique sign ups to unnamed engagements. As such, we cautiously predict that we have engaged with around 25% of all practitioners in our region. The true figure is likely to be between these two figures. These figures exclude the engagements we also get via routine use of West OS, where Individual level data is unavailable.
