NRS carried out a check of the area and believe it will be possible to provide lighting installations to 5 of the trees in the Church St / Byres Road triangle. Presently one tree, located the point where Church St and Byres Road converge, has an installation. Although there are more trees in this car park vicinity, we are influenced by the adjacency to existing street lighting columns for connectivity. Attached for discussions, a map of the area, showing the potential new locations.
