

Dennistoun Place Based Approach within the Glasgow Community Plan noted.

7 There was submitted and noted a report by the Head of Policy and Corporate Governance, regarding the Place Based Approach within the Glasgow Community Plan, advising

- (1) that the Community Empowerment (Scotland) Act required the Glasgow Community Planning Partnership to prepare and publish a Local Outcomes Improvement Plan;
- (2) that the Community Planning Executive Board approved a report on 27th March 2024 proposing that 8 areas in Glasgow be invited to be part of the updated place-based approach, as detailed in appendix 1 of the report;
- (3) that Council's City Administration Committee allocated £1.5m over 3 years to support the place-based work in the identified areas with a local anchor organisation identified in each area and funding used primarily to employ a Community Connector to ensure local people were fully engaged in the work of preparing a local action plan;
- (4) that the Council's Centre for Civic Innovation had been tasked with developing a support model for the 8 areas identified for place-based work and that the current focus was on those areas that do not have an anchor organisation in place; and
- (5) of the ongoing work to develop a process whereby local organisations were informed about the place-based work and invited to engage with the process as well as to potentially express interest in becoming the local anchor organisation that could support the investment available, which for most areas included the employment of a community connector, and support the process of bringing partners and local people together to create an action plan for the area.

After consideration the Partnership noted the report and raised questions that were addressed by D Speirs and that an update would be provided at the next meeting of the Partnership.
