

## **Drumchapel Town Centre Regeneration - Presentation noted.**

**11** There was heard and noted a presentation by Jonny Pickering and Sean Kelly, Neighbourhoods, Regeneration and Sustainability, regarding Drumchapel Town Centre Regeneration, providing information on

- (1) Drumchapel Town Centre Regeneration (DTCR) and the project workstreams which is funded by UK Government and Glasgow City Council's Community Hubs Fund;
- (2) planned improvements adjacent to Drumchapel shopping centre and improvements to the local area to make it easier for everyone to get around, including the new Drumchapel Town Hall, reopened Drumchapel Park pavilion, proposed reinstated junction at Duntreath Avenue, Garscadden Road, Kinfauns Drive and Drumry Road East and a new civic square outside the new town hall. This follows engagement with local people over the past few years;
- (3) DTCR enabling sites to be assembled for new housing, with around 170 new homes developed by Wheatley Homes Glasgow and part funded by the Strategic Housing Investment Programme; and
- (4) vacant derelict land funds work on a Net Zero Masterplan for Drumchapel to look at nature-based solutions to create a climate-resilient community.

Further information will soon be launched on the Council's website in the form of a story map.
