URBACT United Nations Sustainable Development Goals Project – Update noted..

2 There was submitted and noted a report by the Executive Director of Neighbourhoods, Regeneration and Sustainability regarding the URBACT United Nations (UN) Sustainable Development Goals Project (SDGs), advising

(1) of the city's participation in the URBACT Pilot network which explored the localisation of the UN SDGs in the context of Glasgow, together with the next steps as detailed in the report;

(2) that the 17 UN SDGs had been accepted as the blueprint to achieve a more sustainable work for all and represented a call to action to end poverty and inequality, protect the planet, and ensure everyone could enjoy healthy, fulfilling and prosperous lives;

(3) that Glasgow's Climate Plan included a target for achieving a net zero carbon emissions by 2030, while addressing the key impacts of our challenging climate as a result of increased rainfall and increased temperatures, and existing health and socio-economic inequalities; and

(4) of the 2 specific actions in the Climate Plan which linked directly to the URBACT project and that Glasgow's participation in the URBACT network, Global Goals for Cities, alongside 18 other European Cities, supported progress towards both of those actions.
