Kelvingrove Park lighting update noted.

11 There was heard and noted an update by Mr Rory O'Sullivan, Partnership and Development Officer, on behalf of the Executive Director of Neighbourhoods, Regeneration and Sustatinability, regarding lighting in Kelvingrove Park, advising

(1) of the work to entrances and signage to support night-time orientation within the part and reflective banding to street furniture to enhance existing use of bike lights and phone torches for those using the park;

(2) that native shrubs would replace non-native large growing shrubs adjacent to footpaths as it was considered that there might be benefits to biodiversity in replacing them and NRS would select plants which at maturity would grow to a lesser height and would improve visitors line of sight along footpaths to allow visitors to feel safer;

(3) that the work would be carried out outwith bird nesting season; and

(4) that further information could be found at https://www.glasgow.gov.uk/councillorsandcommittees/viewDoc.asp?c=P62AFQDNZ3DNT1NTNT.
