Public electric vehicle charging infrastructure – Update noted.

4 With reference to the minutes of the Environment, Sustainability and Carbon Reduction City Policy Committee of 15th March 2022 (Print 7, page 536) noting an update on the Electric Vehicle Infrastructure, there was submitted and noted a report by the Executive Director of Neighbourhoods, Regeneration and Sustainability providing a further update on the Council's public Electric Vehicle Charging Infrastructure (EVCI), advising

(1) in further detail of the current EVCI network and that a further 119 charge points across 63 units for public use were planned to go live in 2023;

(2) of the EVCI benefits, operations and maintenance;

(3) that it was envisaged that following a communication plan in advance of the tariff implementation an EV charging tariff would be in place by April 2023;

(4) of the draft Vision Statement for EV infrastructure in Scotland and Transport Scotland's national funding programme;

(5) that the Council had engaged with Glasgow City Region (GCR) to commission a consultancy report on the EV landscape which would assist in determining the various options available and the Council's future involvement in EVCI; and

(6) that, once prepared, the EVCI Strategy would be submitted to this committee.
