National Improvement Framework 2021/22 and Scottish Government Stretch Aims 2022/23 – Progress noted.

4 There was submitted a report by the Executive Director of Education Services regarding the outcomes related to the National Improvement Framework related to 2021/22 data from schools across Glasgow Education Service and the collated Stretch Aims for Glasgow Schools,

(1) advising

(a) that each year Education Services was required by the Scottish Government (SG) to present a report on its progress in each of the areas of the National Improvement Framework, and that the data required was determined by the SG;

(b) that this year all local authority Education Services had been asked to work with their schools to determine Stretch Aims, which were realistic targets based on data analysis for groups of children and young people in primary 1, 4 and 7 and secondary 3, and that secondary schools had also been asked to provide Stretch Aims for National 5 and 6 (Higher) SQA qualifications;

(c) that attendance statistics had been used as an indicator for the health and wellbeing Stretch Aim, and that over the session the Service would be engaging in discussions with colleagues to ascertain which tools/indicators would be used to determine progress of children and young people in relation to health and wellbeing; and

(d) that over the next Education session, consideration would be given to 'core plus' data to show progress in other areas of children and young people's school experience; and

(2) detailing in the appendix to the report, Education Services' Annual National Improvement Framework 2022/23.

After consideration, the committee noted

(i) the report; and

(ii) the progress of schools in many areas.
