Non-domestic fires	**5**
Special services	**6**
Unwanted fire Alarm Signals	**6**
Engagement activities	**7**

About the statistics within this report

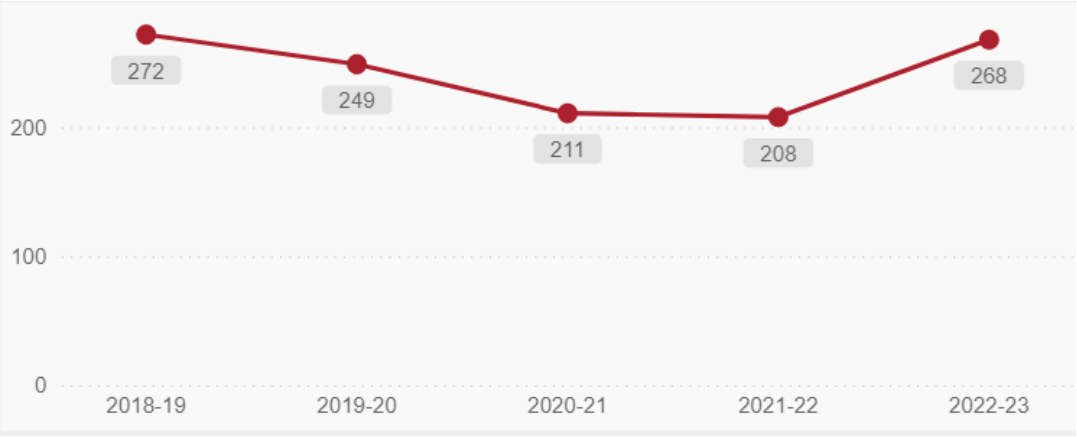

The activity totals and other statistics quoted within this report are published in the interests of transparency and openness. They are provisional in nature and subject to change as a result of ongoing quality assurance and review. Because all statistics quoted are provisional there may be a difference in the period totals quoted in our reports after local publication which result from revisions or additions to the data in our systems. The Scottish Government publishes official statistics each year which allow for comparisons to be made over longer periods of time.

City of Glasgow Total Incidents

During the second quarter of 2022/23 SFRS have responded to a total of 1,787 incidents in the North West of Glasgow. The nature of calls is becoming more diverse. As a result of this SFRS are providing greater public protection across the Emergency Response we provide and this is strengthened through the Prevention and Protection activities carried out throughout the area.

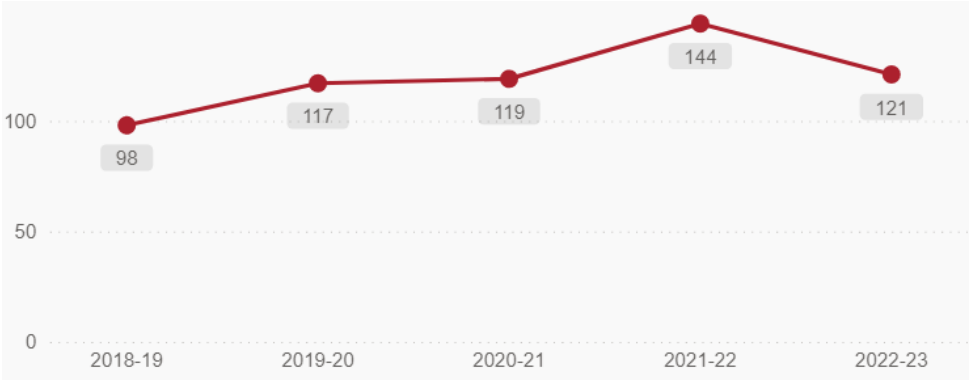

Deliberate Fires

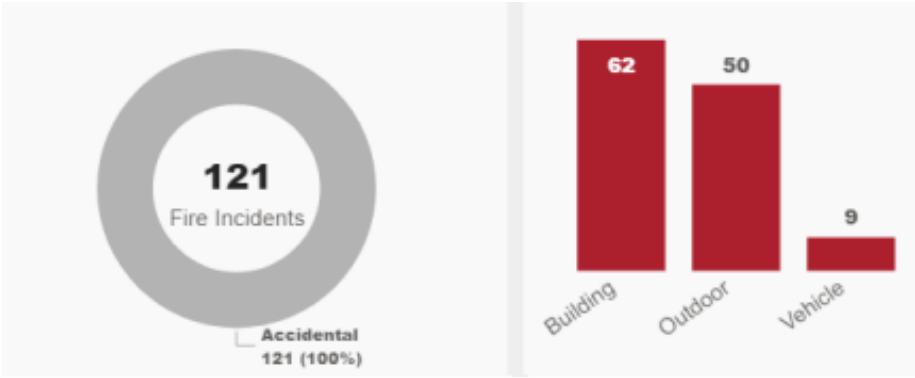

The figure of 268 Deliberate Fires in Q2 2022/23 shows an increase of 60 for the same period in 2021/22.

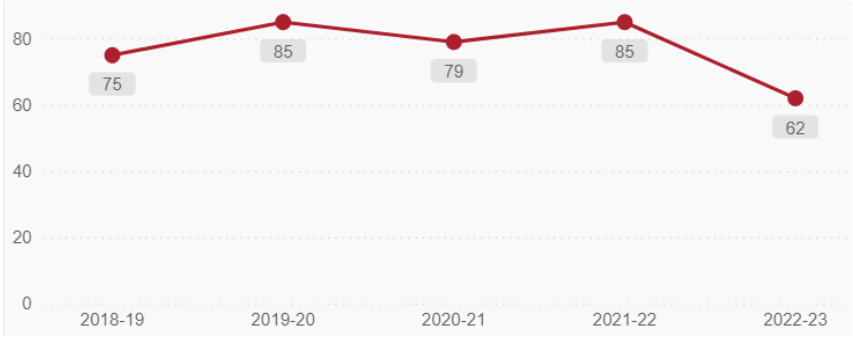

Accidental Fires

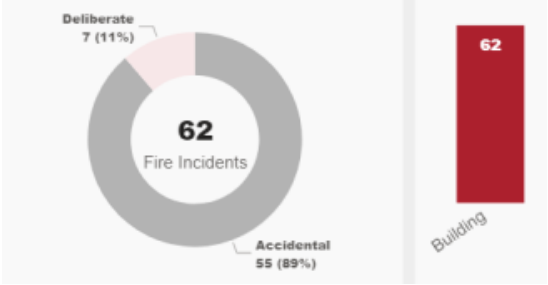

The figure of 121 accidental fires for Q2 2022/23 has seen a decrease of 23 incidents from the previous year's figures of 144. The service installs linked detection in eligible properties, those being owner occupied and high-risk, in compliance with the new Scottish Government Legislation.

Dwelling Fires

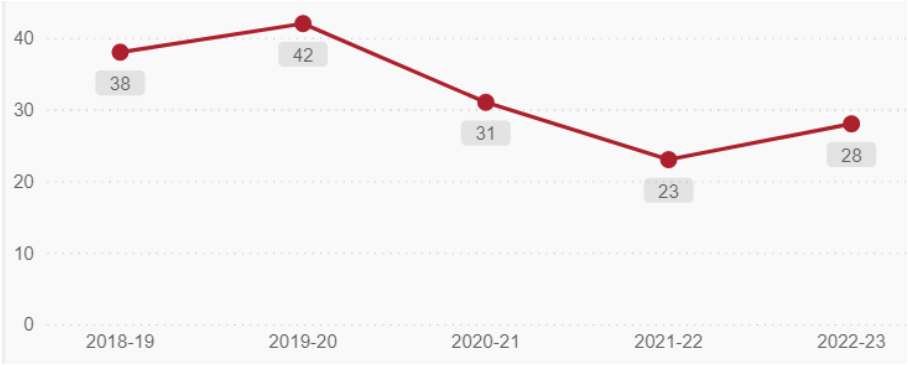

There were 62 Dwelling fires in Q2 of 2022/23, this is a decrease of 23 from the previous year's figures.

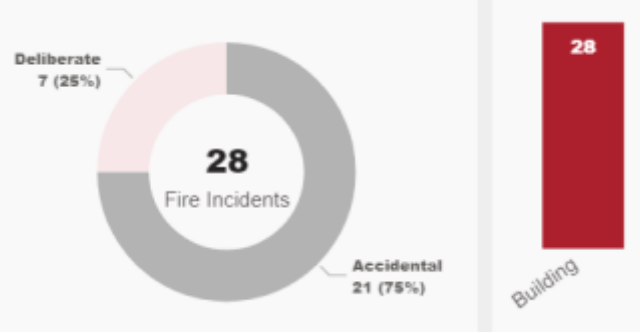

All Fire Casualties

It is pleasing to report the Q2 period has no fire fatalities and a low fire casualty figure of 2.

Non-Domestic Fires

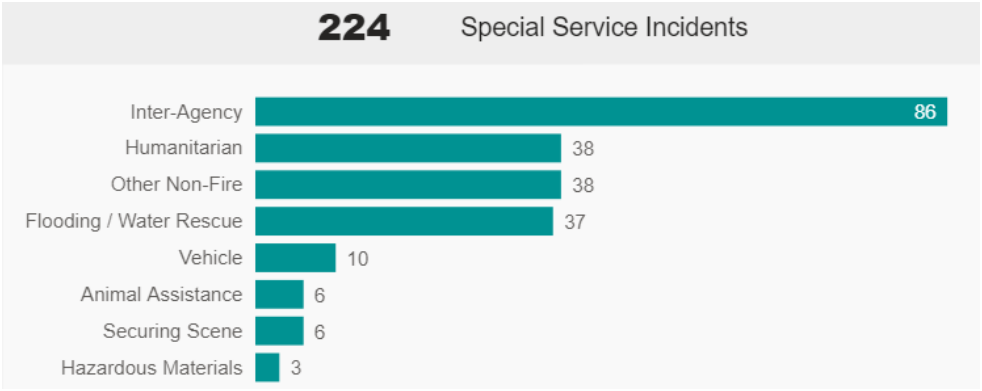

The figure of 28 is an increase of 5 from the previous reporting period in 2021, the increase reflects the return to places of work post pandemic.

Unintentional Injury and Harm

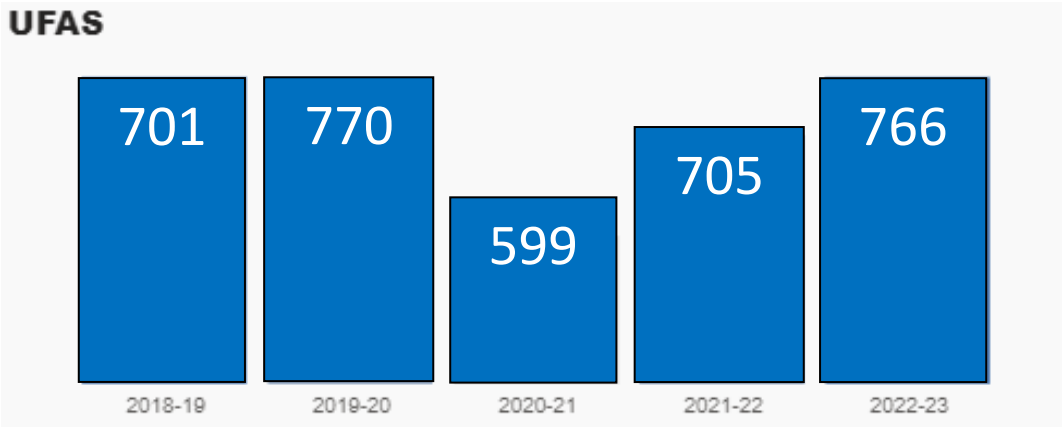

214	264	240	322	224

During the Q2 period SFRS attended 224 special service incidents, a reduction of 102 from the previous year's figure. 38% of these incidents were assisting other agencies.

Unwanted Fire Alarm Signals

The figure of 766 for Q2 2022/23 shows an increase of 61 UFAS incidents from the figure of 705 for the same period last year. It is recognised that many historically regular premises of high UFAS activity were directly affected by the Scottish Government Restrictions in 2021/22 and we are now seeing them return to normal levels.

Prevention and Protection Activities

Fire Skills
We have developed a one-day Fire skills course which has been delivered at Maryhill fire Station, allowing groups to engage with their local Fire Station and learn skills such as CPR, Fire Safety and Water Safety. Police Scotland Campus cops have attended along with teachers at these events and have been well received at every delivery.
Water Safety
We have prioritised reducing the amount of water deaths within Scotland by running a series of engagement events in parks and near bodies of water within the city in partnership with the Glasgow Humane Society, Police Scotland, HMC. We have ran a joint exercise and training with RNLI and Police Scotland to introduce water safety skills to businesses along The River Clyde. This received national coverage by the media.
Engagement
Yorkhill, Maryhill, Knightswood and Cowcaddens Fire stations have conducted 284 Home Fire Safety Visits in Q2, targeting high risk properties, providing health and safety advice and fire safety education. The Community Action Team has carried out 23 Engagement activities in Q2 in the North West Sector and 45 Home Fire Safety Visits. These engagement activities included events such as Leaflet Drops, Fire Skills Courses, Anti-Social Behaviour engagement, Water rescue throwline Training, and Child trafficking awareness.
GLOW
We have created a GLOW account in partnership with Glasgow City Council which has allowed us to upload safety content and teach this online to thousands of students all over Glasgow. So far we have uploaded content pertaining to Bonfire Safety Messaging.
