GOVANHILL

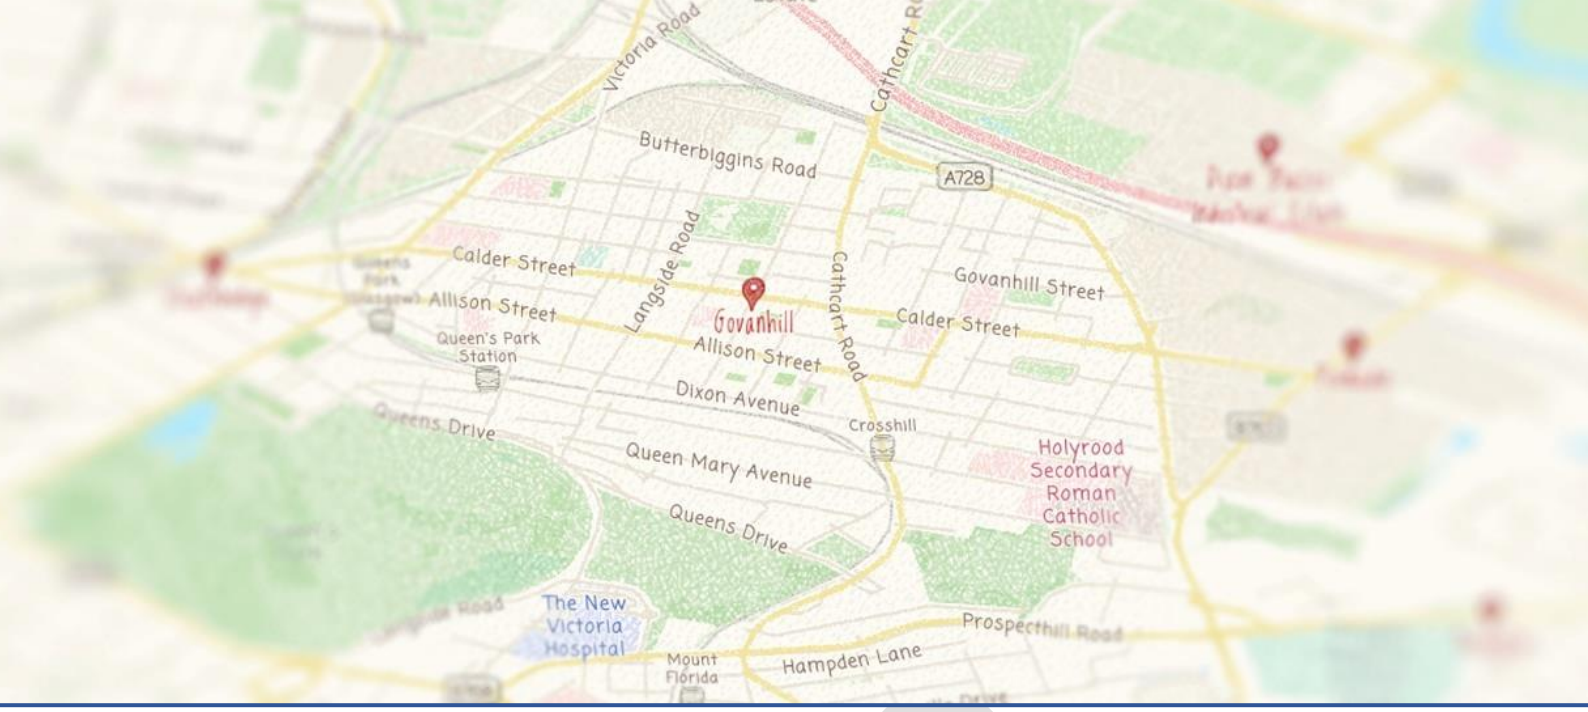

Community Profile

Data gathered together from a range of sources to build a picture of the characteristics, inequalities and resources in Govanhill to support decision making in the community.

GOVANHILL HOUSING ASSOCIATION

GCDT
GOVANHILL COMMUNITY DEVELOPMENT TRUST

This community profile gathers together a range of information and provides a detailed summary of statistics and information relating to the community of Govanhill. This includes population statistics as well as information relating to topics such as education, employment and health.

Different geographic levels are used including intermediate geography and data zones with the intention of providing insights that support discussions and the forming of visions for future programmes in Govanhill through making local information accessible to a wider audience.

Uses of the community profile vary but are often a resource revisited as required for a specific purpose. From supporting funding applications and business plans to identifying potential partnership and collaborative working opportunities or conducting a needs analysis of the community.

About Govanhill

Govanhill is a community in the Southside of Glasgow, one mile from the City Centre.

Home to approximately 17,000 people across the Govanhill Neighbourhood.

Scotland's most ethnically diverse neighbourhood with around 40% of residents from ethnic minorities.

A densely populated area with a high proportion of young people and young adults.

Located close to green space and a wide range of local amenities.

Profile Geography

A variety of sources of information are used to develop this community profile. Information from various different geographic boundaries. Some small areas (Data Zones) that include just a few streets whilst some are larger areas (Intermediate Zones and Neighbourhood).

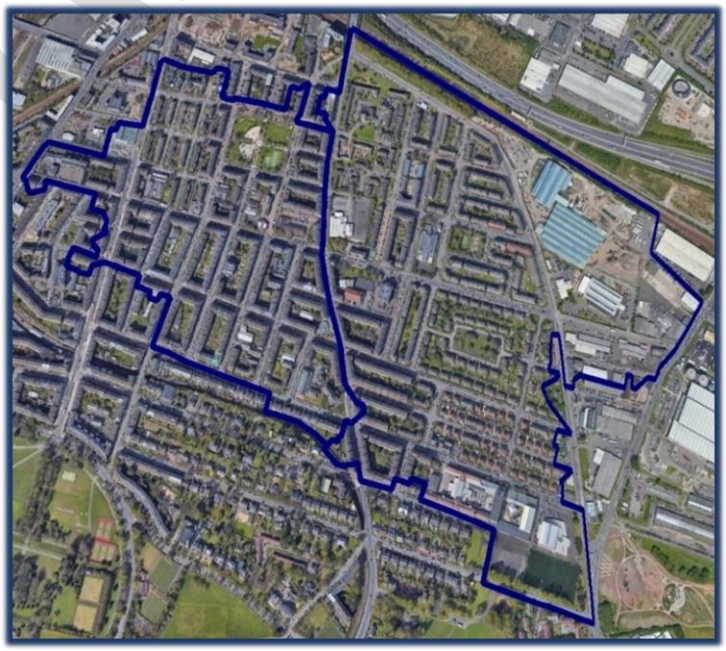

Data Zones

Data Zones are small geographical areas that can be found all over Scotland. There are 6,976 in total with an average population of 700-800 people. They are a method used primarily to measure deprivation. Each data zone has a unique number which makes the area identifiable when accessing statistics and information.

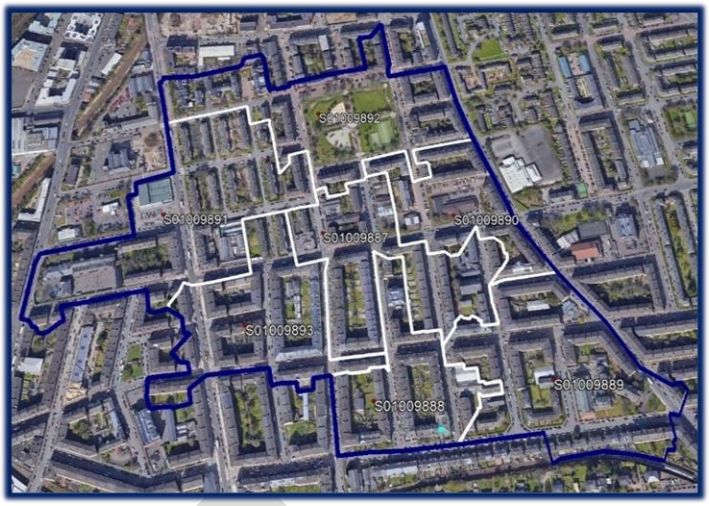

Intermediate Zones

Not all statistics are suitable for release at the data zone level because of the sensitive nature of the statistics or for reasons of reliability. A statistical geography between data zone and local authority level was required, which resulted in the creation of intermediate zones. The two intermediate geography zones covered in this community profile are *Govanhill East and Aikenhead* and *Govanhill West*.

Each intermediate zone consists of data zones that fit perfectly within their boundaries allowing to see the overall picture of statistics for a larger community but also look deeper to find information in smaller areas, useful for engaging in more localised projects and activities.

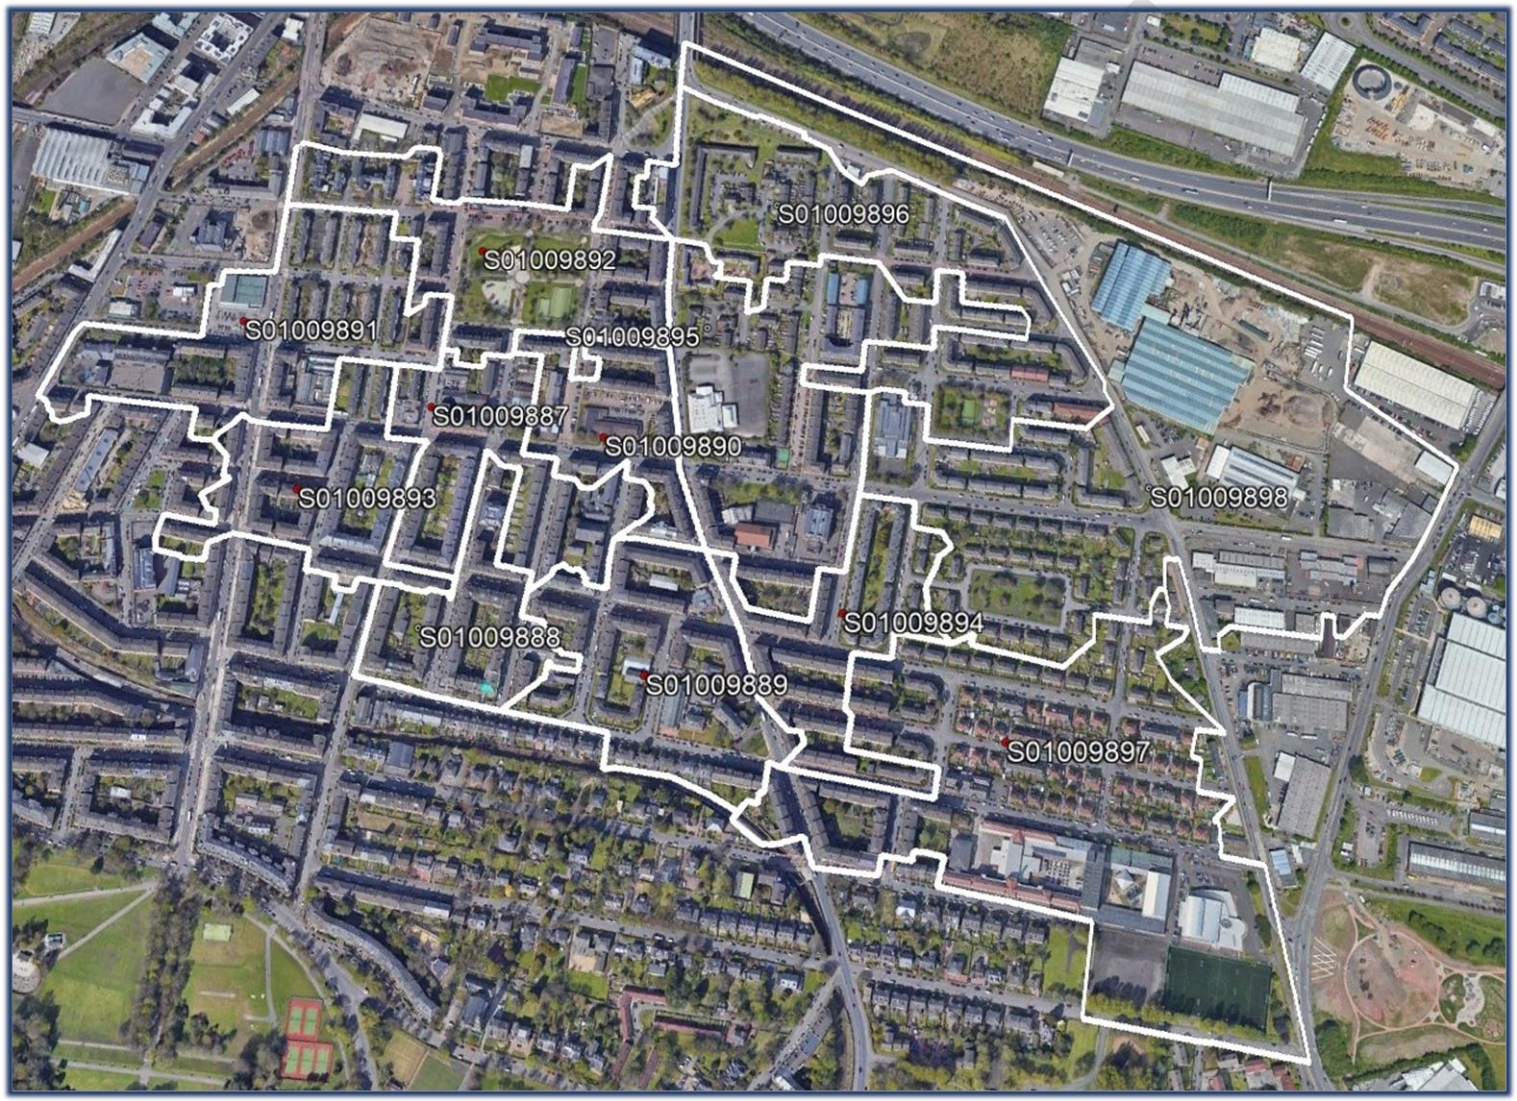

Neighbourhood

Govanhill is one of 56 neighbourhoods within Glasgow that are defined in the City's Neighbourhood Plan. Whilst much of the data relating to the Neighbourhood is based on 2011 Census data, some information is still relevant and is therefore included in this profile. A mix of information relating to the Neighbourhood and the intermediate zones is supplied.

Population Profile

A knowledge of population demographics and, in particular, the age of the population within a community provides a basis to make informed decisions. Population statistics are available for each of the intermediate zones in Govanhill and the smaller data zone areas within each of these. Using data zones, it is also possible to provide a population estimate for the Govanhill Neighbourhood.

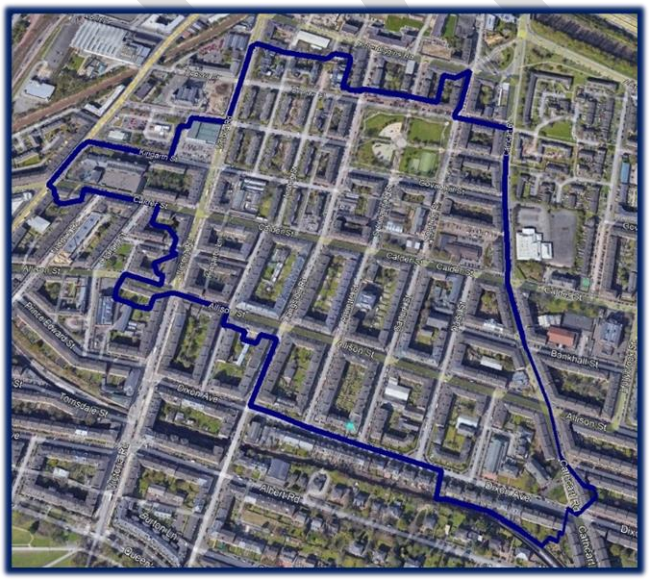

Population statistics are provided for 2021 mid-year estimates from the National Records of Scotland.

Govanhill East & Aikenhead

	Number	%
Age 0-4	368	7.98%
Age 5-12	509	11.05%
Age 13-17	220	4.77%

Age 26-30	455	9.87%
Age 31-40	819	17.78%
Age 41-50	592	12.85%
Age 51-60	554	12.02%
Age 61-65	227	4.92%
Age 66-70	172	3.73%
Age 71-75	145	3.14%
Age 76-80	84	1.82%
Age 81-85	63	1.36%
Age Over 86	56	1.21%
Total population	**4606**	

Govanhill West

	Number	**%**
Age 0-4	435	7.62%
Age 5-12	685	12.01%
Age 13-17	263	4.61%
Age 18-25	491	8.61%
Age 26-30	695	12.18%
Age 31-40	1102	19.32%
Age 41-50	769	13.48%
Age 51-60	597	10.47%
Age 61-65	173	3.03%
Age 66-70	144	2.52%
Age 71-75	98	1.71%
Age 76-80	86	1.50%
Age 81-85	88	1.54%
Age Over 86	76	1.33%
Total Population	**5702**	

Key population age characteristics from the Govanhill intermediate zones (comparator statistics are provided by the National Records of Scotland):

- 23.8% of the population in Govanhill East and Aikenhead and 24.2% in Govanhill West are under 18, compared to a Scottish average of 18.7%.
- 4.8% of the population in Govanhill East and Aikenhead and 4.6% in Govanhill West are aged over 75, compared to a Scottish average of 8.7%.
- The population aged 0-15 years in Govanhill East and Aikenhead (22.2%) and Govanhill West (22.8%) is significantly higher than the Scottish average of 16.6%.
- The population aged 1-4 years is significantly higher than the Scottish average of 3.8% in both Govanhill East and Aikenhead (6.4%) and Govanhill West (6.0%).

Govanhill Neighbourhood

	Number	%
Age 0-4	1244	7.27%
Age 5-12	1732	10.12%
Age 13-17	722	4.22%
Age 18-25	1433	8.37%
Age 26-30	2110	12.33%
Age 31-40	3569	20.86%
Age 41-50	2314	13.52%
Age 51-60	1805	10.55%
Age 61-65	648	3.78%
Age 66-70	498	2.91%
Age 71-75	383	2.23%
Age 76-80	250	1.46%
Age 81-85	215	1.25
Age Over 86	183	1.06%
Total Population	**17106**	

From the data for Govanhill Neighbourhood, it is possible to say that if Govanhill Neighbourhood was a village of 100 people...

- 7 would be of pre-school age.
- 10 would be in primary school; 4 would be in high school.
- 21 would be aged between 18 and 30.
- 9 would be aged 66 or over.
- Approximately 4 would be aged over 75.

The Govanhill Neighbourhood population is calculated using the age breakdown of Govanhill East and Aikenhead and Govanhill West intermediate zones and seven additional data zones where a significant proportion of the population is found within the Neighbourhood boundary. An interactive map detailing these data zones with a population age breakdown can be accessed at the following link: Govanhill Neighbourhood Age by Data Zone

Population by Data Zones

It is possible to provide an age breakdown for each of the data zones within the Govanhill Neighbourhood. Data zones have a unique number starting with S010 followed by 5 digits. Use the corresponding data zone numbers on the maps with the information in the tables that follow. As mentioned above, an interactive map of data zones and the population age breakdown is available and can be accessed here: Govanhill Neighbourhood Age by Data Zone

Key population age characteristics from the Govanhill data zones:

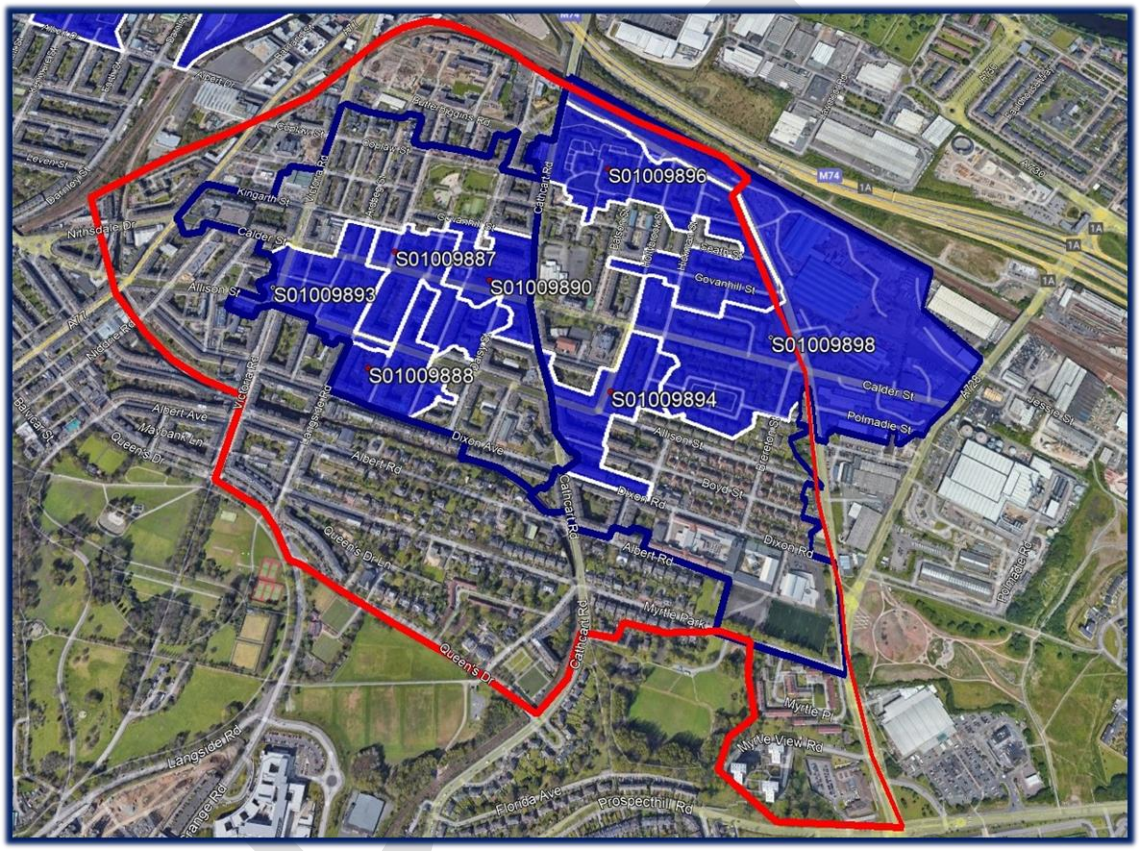

- Two data zones in Govanhill, S01009894 in Govanhill East and Aikenhead and S01009887 in Govanhill West have a proportion of pre-school age children in the top 1% for data zones in Scotland – approximately 10% each. The data zone with the highest pre-school age population is in Stranraer with 12.9% as a comparison.

- Data zone S01009902 which is found within the Battlefield intermediate zone has the oldest population in Govanhill both in terms of absolute numbers aged over 75 (76 people) but also as a proportion of overall population (8.39%).

- At 32.96%, data zone S01009882 has one of the highest proportions of people aged 31-40 in the country – 34 out of 6,976 data zones. For comparison, the highest proportion of people aged 31-40 can be found in Gorgie West, with 38.65%.

Using data zone population statistics, it is possible to map the areas in Scotland with the highest percentage of children and young people under the age of 16. This can be useful for highlighting school-aged population, childcare needs and age-specific projects such as Summer and after-school clubs.

One way of doing this is taking the 10% of the data zones (698 out of 6,976) with the highest proportion of the total population aged under 16. Using this method reveals there are seven data zones in Govanhill East and Aikenhead and Govanhill West with a children and young people population in the highest 10% in Scotland. Click on the map below to access an interactive map and a closer look at these Govanhill data zones.

The percentage of people aged under 16 in Scotland is 16.6%. Within the data zones shown in blue on the map above, the lowest percentage of people aged under 16 is 24.3% and the highest is 32.3%. All % are outlined in the table below.

Data Zone	Intermediate Zone	Total Under 16 Years	%
S01009894	Govanhill East and Aikenhead	235	24.3
S01009896	Govanhill East and Aikenhead	281	24.8
S01009898	Govanhill East and Aikenhead	198	26.9
S01009887	Govanhill West	239	25.5
S01009888	Govanhill West - 02	218	32.3
S01009890	Govanhill West - 04	168	25.3
S01009893	Govanhill West - 07	247	25.4

The Glasgow Indicators Project by Understanding Glasgow (understandingglasgow.com) provide information regarding the children and young people population for each neighbourhood in Glasgow including the Govanhill Neighbourhood.

Indicator	Count	Rate	Difference from Glasgow Average	Time Period
Birth rate (per 1,000 pop'n)	282	19.5	60%	2013
Under 25s from a minority ethnic group	2,187	52%	209%	2011
Infants who sleep in the supine position	172	90%	-3%	2015
Babies exposed to passive smoking	N/A	14%	-6%	2014/15
Babies with birth weight below 2500g	32	4%	63%	2013 - 2015
Babies born before 37 weeks	N/A	9%	34%	2010/11 - 2014/15
Mothers smoking at health visitor's first visit	N/A	9%	-34%	2010/11 - 2014/15
Children who walk to primary school	N/A	72%	36%	2008 - 2015
Under 16s living within 400m of green space	2,037	76%	-4%	2014
P1 children who are obese or severely obese	N/A	9%	45%	2012/13 - 2014/15
Hospitalisations for dental treatment (per 1,000 pop'n under 16)	59	22.2	67%	2014
Children (under 16) living within 500m of vacant or derelict land	3,340	77%	31%	2014
Off-licensed premises (per 1,000 pop'n under 18)	16	5.2	4%	2016
Child pedestrian and cyclist road casualties (per 1,000 pop'n under 16)	14	5.1	87%	2013 - 2015
Hospitalisations under an alcohol-related diagnosis (per 1,000 pop'n under 25)	34	7.9	14%	2011 - 2015
Referrals to Scottish Children's Reporter Administration	78	3%	63%	2015/16
Offenders (per 1,000 pop'n aged 8 to 18)	151	104.1	250%	2015/16
Victims of crime (per 1,000 pop'n aged 8 to 18)	74	51	142%	2015/16
Emergency hospitalisations for unintentional injuries (per 1,000 pop'n under 15)	N/A	8.3	-18%	2010/11 - 2014/15
*Lone parent households	445	31%	-23%	2011
*Overcrowded households with children	652	34%	88%	2011
*Under 25s living in households with no central heating	158	4%	44%	2011
S4 pupils achieving 5 or more qualifications at SCQF Level 5	31	30%	-14%	2012 - 2013
Children with communication delay at 27 to 30 months	166	35%	50%	2014
Secondary school attendance	N/A	90%	-2%	2013/14
School leavers with a positive destination	87	85%	-5%	2013
Referrals to Children and Adolescent Mental Health Services	50	2%	-44%	2015/16

*Data from the 2011 census is included as a guide but it is recommended waiting until data is released relating to households from the 2022 census later in 2023.

Similarly, the Scottish Public Health Observatory also provide data profiles relating to young people by intermediate zones. The table below outlines the findings for Govanhill East and Aikenhead and Govanhill West with Scottish average data for comparison.

The Scottish Index of Multiple Deprivation 2020 provides further data for young people in each individual data zone within the Govanhill Neighbourhood. Attendance rates, attainment scores, the percentage entering university and the proportion of people aged 16-19 not in education, employment or training (NEET) are all provided.

Govanhill East and Aikenhead Data Zones

Data Zone	School Pupils Attendance (%)	Attainment Score of School Leavers	Aged 16-19 NEET (%)	17-21 year olds entering university (%)
S01009894	66%	5.00	7%	6%

Children in Low Income Families

Govanhill Neighbourhood has the highest proportion of children in low income families across each of the Glasgow neighbourhoods. [15]Understanding Glasgow provides data showing for 2020/21, the average proportion of children in low income families in Glasgow was 29.5%, rising to 70.1% in Govanhill. A graph detailing the levels of children in low income households is provided.

Graph source: Understanding Glasgow

The Community Planning Outcomes Profiler provided by the Improvement Service for tracking improvements in communities across Scotland provides a breakdown of child poverty rates for each intermediate zone over a number of years. The table below provides the rate for the past five years in Govanhill and Aikenhead and Govanhill West.

	2018-2019 Child Poverty %	2019-2020 Child Poverty %	2020-2021 Child Poverty %	2021-2022 Child Poverty %	2022-2023 Child Poverty %	2023-2024 Child Poverty %
Govanhill East and Aikenhead	67.2	71.5	56.4	59.3	62.2	65.4
Govanhill West	86.2	82.1	70.6	71.3	72.0	72.7

[15] Understanding Glasgow Children in poverty

The children in low income families (CiLIF) statistics, provide information on the number and proportion of children living in relative and absolute low income before housing costs. It is possible to also provide statistics relating to child poverty by data zone. An interactive map can be accessed here that shows the data in the table below that relates to child poverty within the Govanhill Neighbourhood data zones.

Data Zone	Intermediate Zone	Population Aged 0-15	% Children in low income households
S01009894	Govanhill East and Aikenhead	235	48.72%
S01009895	Govanhill East and Aikenhead	143	43.17%

DRAFT

Households

Information contained in this section is derived from the 2011 Census and, as a result, is intended as a guide with recommendations of updating with the 2022 census data when released later in 2023. It is also important to note that within *A Better Govanhill* by the Govanhill Regeneration Group attention is drawn to a debate as to how well the Census identified the real population, potentially providing underestimates for the ethnic minority population.

"Evidence from school rolls and GP registration data suggest that there is a substantial Roma community in Govanhill that is not reflected in these official statistics. Indeed, a mapping exercise in 2014, supported by the Scottish Government, identified approximately 3-3,500 Roma residents in the neighbourhood and local service providers estimate that this number has increased since that time."[16]

"The available statistics show that more than a quarter (28%) of local people were born in a country other than the UK; this compares to 12% of people citywide. The Govanhill figure is almost certainly a significant under-estimate given the under-collection of data amongst the ethnic minority communities. 7% of local people have some difficulty with the English language, which is more than double the 3% recorded for the city as a whole and, based on service providers' experience of the local area, almost certainly an under-estimate."[17]

Key findings from Glasgow's Housing Strategy 2017-2022 using the 2011 Census profiles:

Household Size	Govanhill Number	Govanhill %	Glasgow %
One person	3910	52.76%	43.13%
Two people	1860	25.10%	30.35%
Three people	701	9.45%	13.71%
Four people	492	6.64%	8.41%
Five people	275	3.71%	3.16%
Six people	94	1.27%	0.73%
Seven people	45	0.60%	0.26%
Eight or more	34	0.45%	0.16%

Housing Tenure	Govanhill %	Glasgow %
Owner occupied	32.83	43.4
Private rented	35.19	20.4
Social rented	31.98	36.39

Occupied household spaces with no central heating	576	7.77%	3.98%

Health and Wellbeing

The tables below outline information relating to health and wellbeing for the intermediate zones of Govanhill East and Aikenhead and Govanhill West. Information is supplied by the Scottish Public Health Observatory with the Scottish average also provided to allow comparisons to be made.

Note that where the table states 'rate per 100,000 or 1,000', this means "*if there were 100,000 people in Govanhill East and Aikenhead or Govanhill West there would be … affected by the statistic*". It is useful to compare this with the Scottish average rate.

Govanhill East and Aikenhead

Indicator	Period	Number	Measure	Scottish Average
People living in 15% most 'access deprived' areas	2017 calendar year	0	0%	15%
Alcohol-related hospital admissions	2020/21 financial year	42	912.38 per 100,000	621.29 per 100,000
Asthma patient hospitalisations	2019/20 to 2021/22 financial years; 3-year aggregates	6.33	137.41 per 100,000	68.44 per 100,000

Health Indicators by Data Zone

The SIMD 2020 allows us to identify indicators of each of the data zones in Scotland, including those within the Govanhill Neighbourhood. The tables below include health statistics and correspond to the data zones and Neighbourhood map on page 7.

Standardised ratios: *A value of 100 is the Scotland average for a population with the same age and sex profile. This is the method used for the comparative illness factor and hospital stays for alcohol and drug use.*

Data Zone	Intermediate Zone	Comparative Illness Factor	Hospital Stays related to Alcohol use	Hospital Stays related to Drug use	Proportion of population being prescribed drugs for anxiety, depression or psychosis (%)
S01009895	Govanhill East and Aikenhead	220	247	198	28%
S01009898	Govanhill East and Aikenhead	220	291	722	22%
S01009894	Govanhill East and Aikenhead	210	207	94	25%
S01009896	Govanhill East and Aikenhead	200	271	441	22%
S01009897	Govanhill East and Aikenhead	160	203	78	21%
S01009892	Govanhill West	210	226	363	26%
S01009887	Govanhill West	200	264	189	17%

DRAFT

S01009889	Govanhill West	160	229	257	17%
S01009890	Govanhill West	140	235	77	22%
S01009891	Govanhill West	140	142	69	17%
S01009893	Govanhill West	120	110	214	15%
S01009888	Govanhill West	100	144	138	11%
S01009902	Battlefield	170	166	253	25%
S01009903	Battlefield	125	179	136	17%
S01009882	Pollokshields East	85	86	7	12%
S01009907	Strathbungo	145	220	193	19%
S01009905	Strathbungo	100	156	77	14%
S01009906	Strathbungo	85	66	43	15%
S01010033	Laurieston and Tradeston	190	201	224	24%

Using the standardised ratios values, we can say that:

Comparative Illness Factor

CIF is a combined count of the total number of people receiving one or more of Disabled Living Allowance (DLA), Attendance Allowance, Incapacity Benefit (not receiving DLA), Employment Support Allowance and Severe Disablement Allowance. 15 data zones in the Govanhill Neighbourhood have a higher rate than that of Scotland.

Hospital stays related to alcohol use

17 data zones in the Govanhill Neighbourhood have a higher rate of hospital stays related to alcohol. Data zone S01009898 in Govanhill East and Aikenhead has a rate almost three times higher than that of Scotland.

Hospital stays related to drug use

12 data zones have a drug related hospital stay higher than the national average. Five are more than three times the Scottish rate. Data zone S01009898 in Govanhill East and Aikenhead has a rate over seven times higher than Scotland.

DRAFT

Scottish Index of Multiple Deprivation 2020

The Scottish Index of Multiple Deprivation 2020 (SIMD 2020) is used to identify small concentrated areas of deprivation across Scotland. 'Deprived' does not just mean 'poor' or 'low income'. It can also mean people have fewer resources and opportunities, for example in health and education. The SIMD includes a combination of 7 domains to provide an overall rank of deprivation. Each domain has a set of indicators outlined below.

Income

- Percentage of people who are income deprived.
- Number of people who are income deprived.

Employment

- Percentage of people who are employment deprived.
- Number of people who are employment deprived.

Health

- Comparative Illness Factor.
- Hospital stays related to alcohol use.
- Hospital stays related to drug use.
- Standardised mortality ratio.
- Proportion of population being prescribed drugs for anxiety, depression or psychosis.
- Proportion of live singleton births of low birth weight.
- Emergency stays in hospital.

Education, Skills and Training

- School pupil attendance.
- Attainment of school leavers.
- Working age people with no qualifications.
- Proportion of people aged 16-19 not in education, employment or training.
- Proportion of 17-21-year-olds entering university.

Geographic Access to Services

- Average drive time to a petrol station, GP surgery, post office, primary school, secondary school and retail centre in minutes.
- Public transport travel time to a GP surgery, post office and retail centre in minutes.
- Percentage of premises without access to superfast broadband (at least 30Mb/s).

Crime

- Recorded number and rate per 10,000 people of recorded crimes of violence, sexual offences, domestic housebreaking, vandalism, drugs offences, and common assault

Housing

- Number of people in households that are overcrowded
- Number of people in households without central heating

DRAFT

Govanhill and the SIMD 2020

The SIMD ranks each data zone in Scotland from the most deprived to the least deprived (**1=most deprived, 6976= least deprived**). The SIMD was originally produced in 2004 and has been updated in 2006, 2009, 2012, 2016 and most recently in January 2020. The table below shows the data zones found within the Govanhill Neighbourhood and the overall rank for each data zone in the SIMD 2020.

Data Zone	Intermediate Zone	SIMD2020 Rank
S01009895	Govanhill East and Aikenhead	277
S01009894	Govanhill East and Aikenhead	504
S01009898	Govanhill East and Aikenhead	679
S01009896	Govanhill East and Aikenhead	567
S01009897	Govanhill East and Aikenhead	2132
S01009888	Govanhill West	1146
S01009893	Govanhill West	1807
S01009889	Govanhill West	985
S01009887	Govanhill West	552
S01009890	Govanhill West	1151
S01009892	Govanhill West	582
S01009891	Govanhill West	2103
S01009902	Battlefield	1573
S01009899	Battlefield	3116
S01009907	Strathbungo	1332
S01009906	Strathbungo	2603
S01009905	Strathbungo	1851
S01009882	Pollokshields East	3752
S01010033	Laurieston and Tradeston	651

7 out of 19 data zones found within the Govanhill Neighbourhood fall within the most deprived 10% in Scotland. 1 of these is within the most deprived 5%. The most deprived 10% are those data zones with an overall rank between 1 and 697.

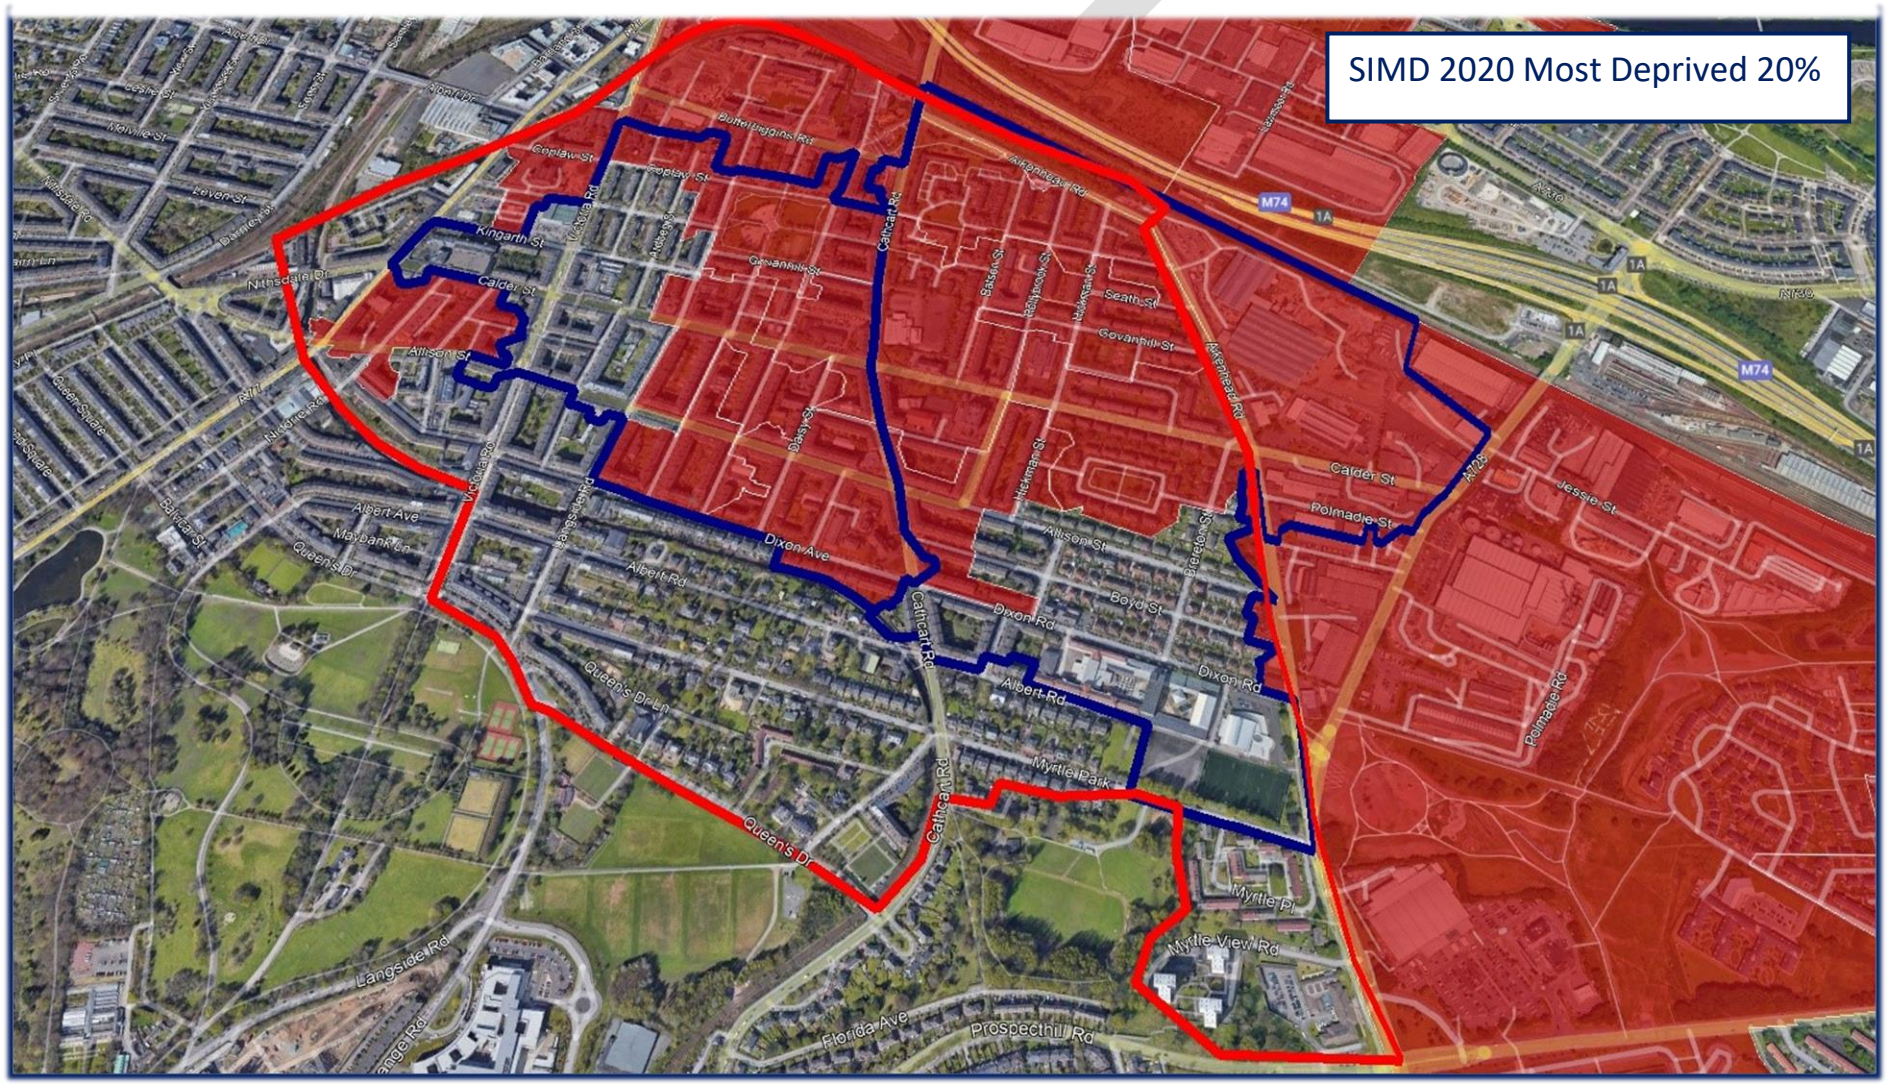

*Note: SIMD 2020 state that SIMD identifies deprived areas - not people. Not all people experiencing deprivation live in deprived areas. About two out of three people on low income do not live in deprived areas. Not everyone in a deprived area is experiencing deprivation. About one in three people living in a deprived area are on low income.

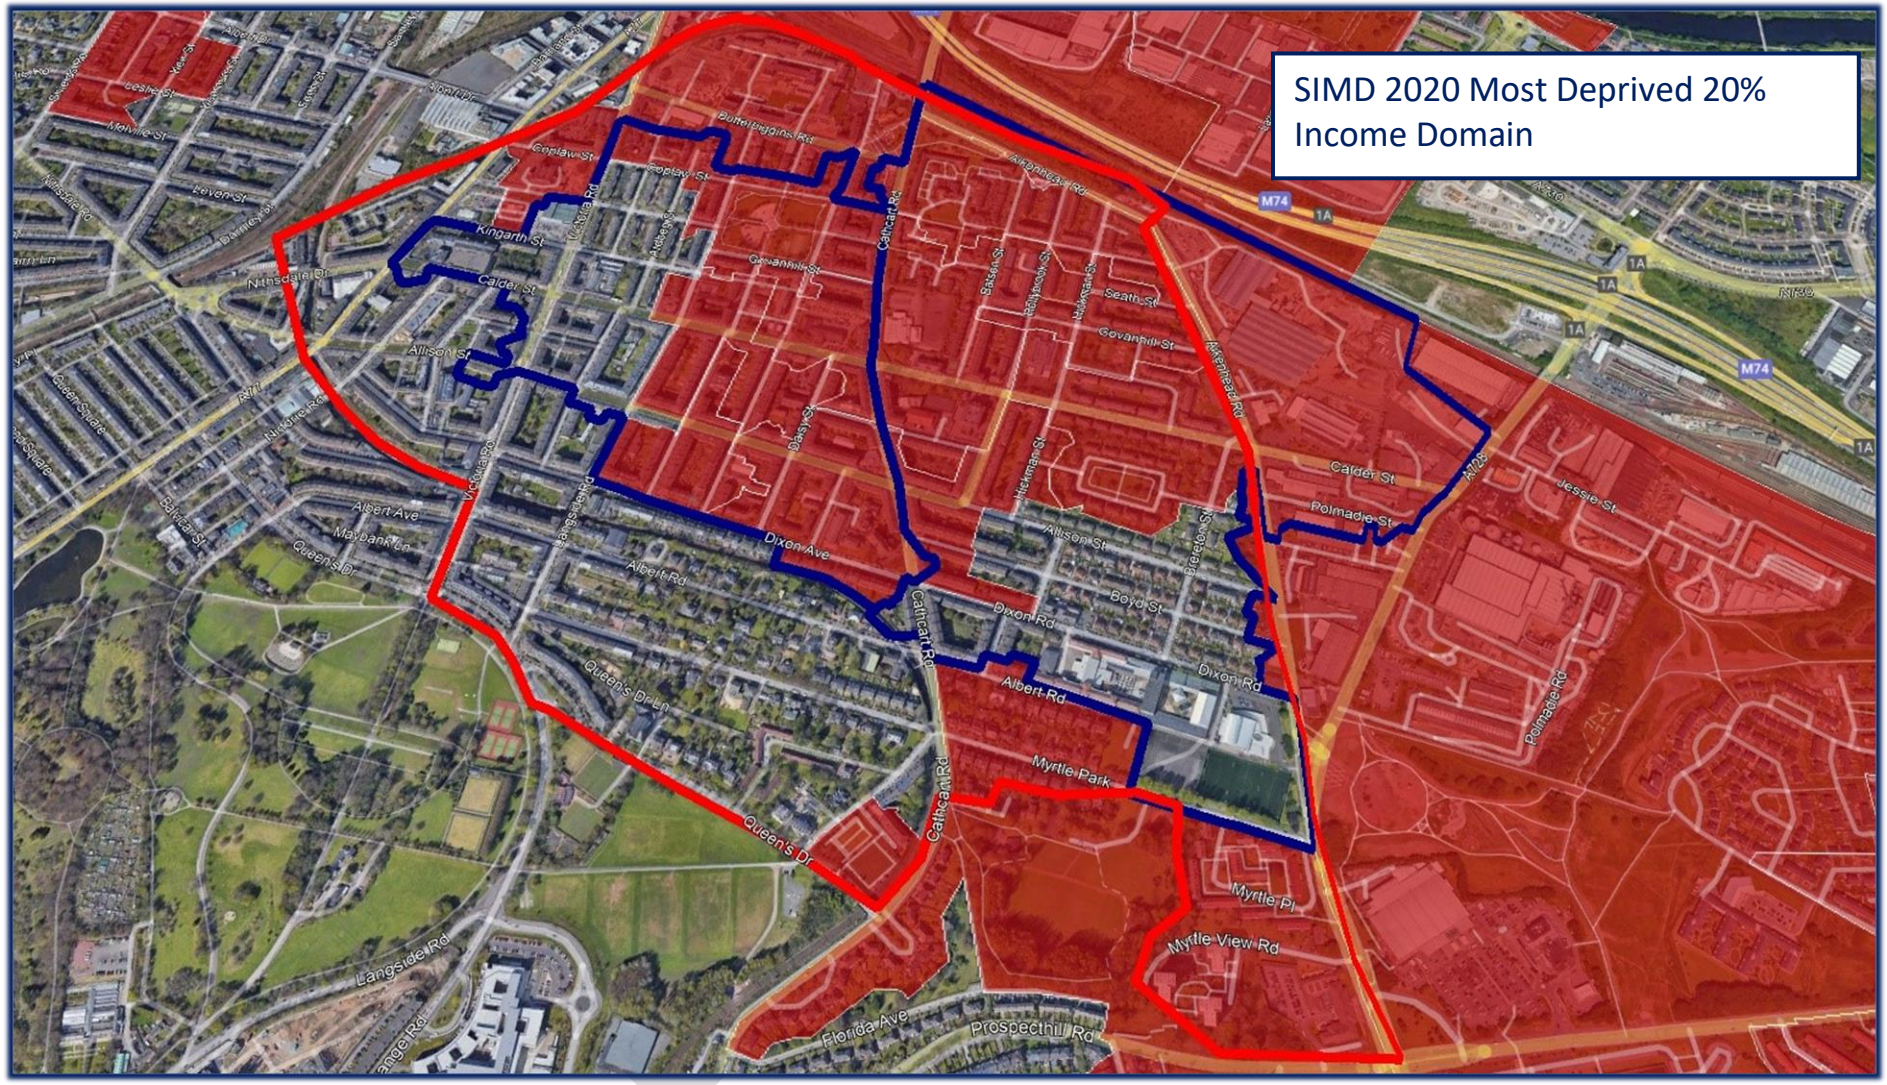

DRAFT

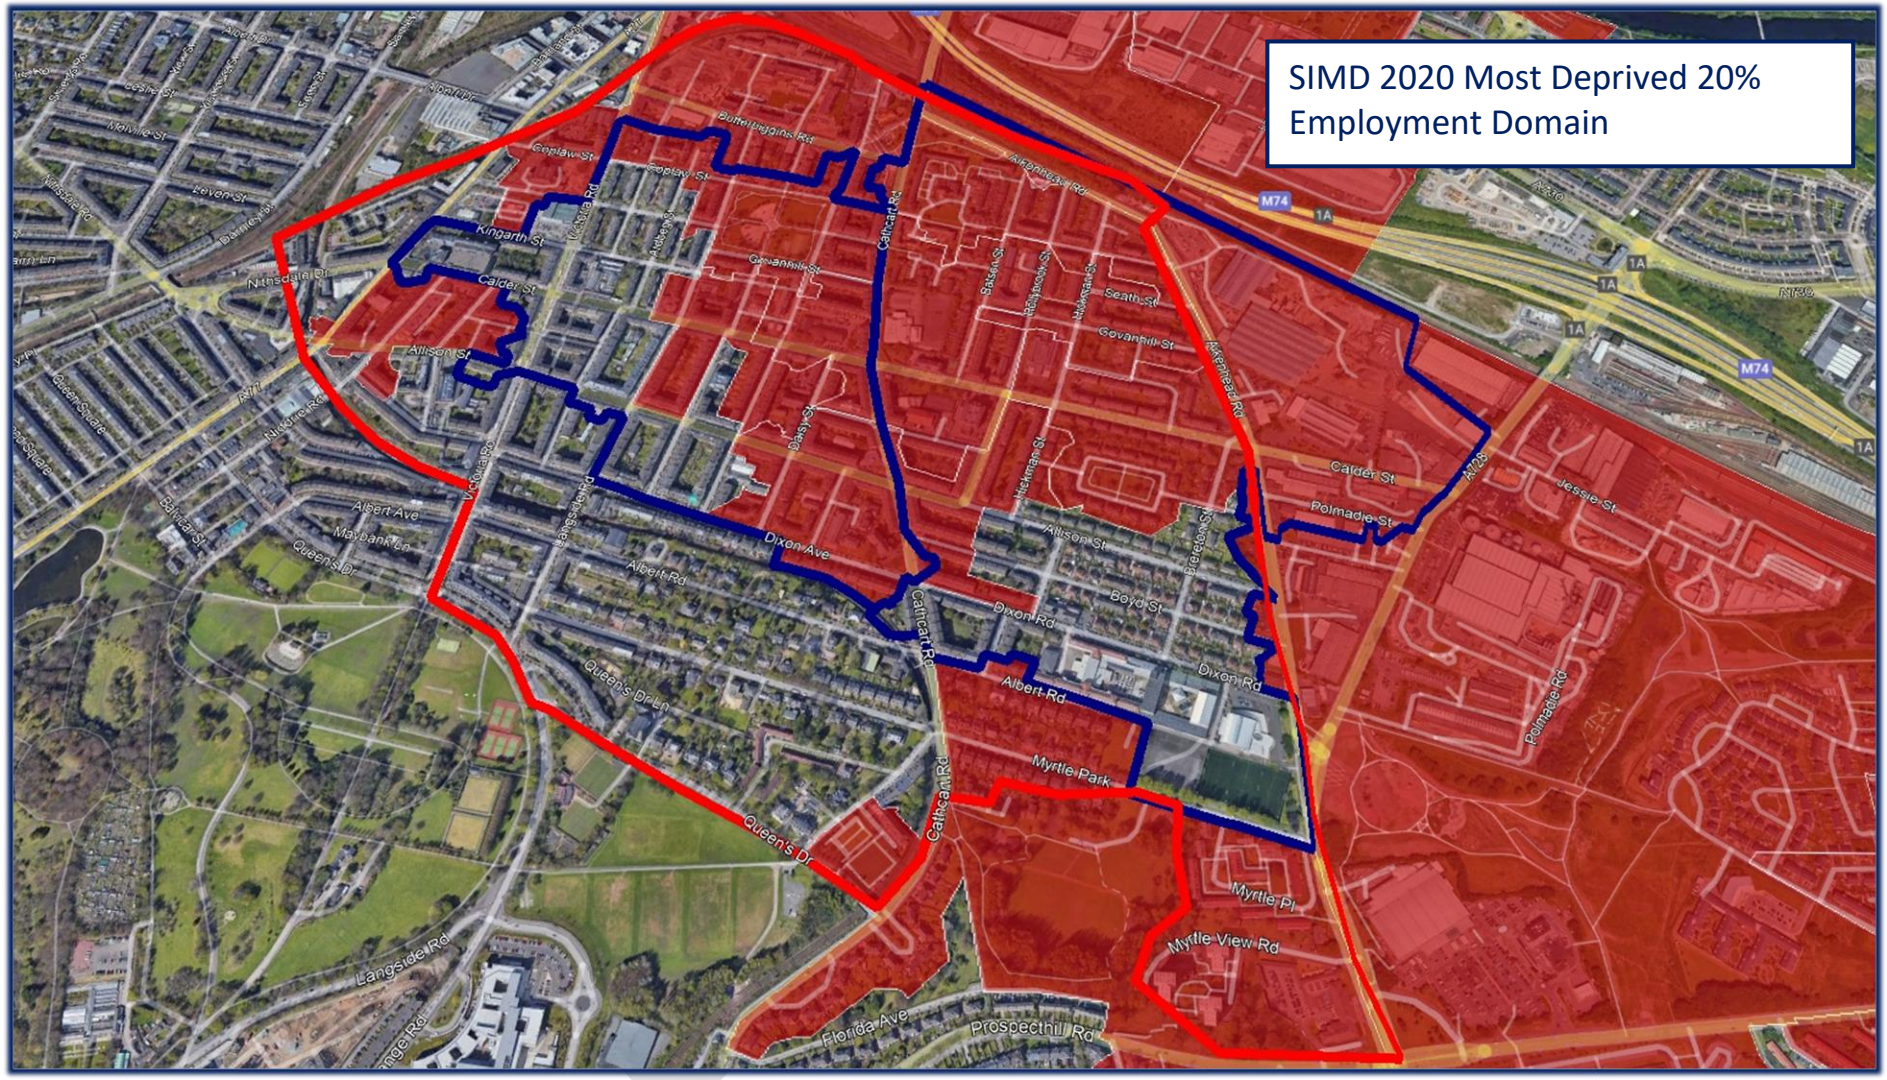

The table below shows the data zones within the Govanhill Neighbourhood and the rankings for each of the 7 individual domains. The overall rank is provided using each of the 7 domains. Some data zones may not have an overall rank within the most deprived 5-10% but may have a domain found within the most deprived in Scotland. Any ranks that occupy the most deprived 10% are highlighted in red.

Income and Employment

The SIMD 2020 makes it possible to identify indicators for each of the data zones in Scotland, including those found within the Govanhill Neighbourhood. An interactive map showing the data in the table below is available here. The data zones in the table below correspond to those on the map on page 7 of this profile.

Data Zone	Intermediate Zone	Working Age Population	Income deprived %	Income deprived Number	Employment deprived %	Employment deprived Number
S01009894	Govanhill East and Aikenhead	583	31%	269	23%	133
S01009895	Govanhill East and Aikenhead	524	31%	239	25%	128

S01009907	Strathbungo	609	21%	162	17%	102

The income deprived population in Govanhill East and Aikenhead is 26.8% (1,190 people) whilst in Govanhill West it is 24.4% (1,392 people). The Scottish average is approximately 13%.

The employment deprived working age population in Govanhill East and Aikenhead is 19.5% (567 people), with 15.7% of the working age population in Govanhill West being employment deprived (609 people). The Scottish average for employment deprived population is 9.3%.

Business Register and Employment Survey

The analysis below is taken from the NOMIS Business Register and Employment Survey (ONS), from 2021. This is an employer survey of the number of jobs held by employees broken down by detailed industry. The survey records a job at the location of an employee's workplace. The first table provides overall information relating to employers within the intermediate zones; the second table breaks the information down into data zones.

Industry	**Govanhill East and Aikenhead**	**Govanhill West**
Agriculture, forestry & fishing	0	10
Mining, quarrying & utilities	5	10
Manufacturing	100	20
Construction	50	35

Environment

Within Govanhill, almost 5,000 people live within 500 metres of a derelict site (2,704 in Govanhill East and Aikenhead and 1,783 in Govanhill West). In Govanhill East and Aikenhead, the proportion of people living within 500 metres of a derelict site is over double the national average of 27%[18].

A 2019 report by the Scottish Land Commission found that derelict sites can have a detrimental impact on a community's health, environment, economy and social cohesion[19].

Approximately 76% of under 16s in Govanhill live within 400 metres of green space, which is 4% less than the Glasgow average. Greenspaces have substantial environmental and health and wellbeing impacts. They also link to community aspects, such as community cohesion, social connectedness and community resilience. Being able to access high quality greenspace can improve the health, wellbeing and confidence of people and communities. There is a significant negative correlation between self-reported stress and the proportion of greenspace in a local area[20].

Community Assets

A Better Govanhill report by the Govanhill Regeneration Group outlines a range of community assets found within Govanhill. The report can be accessed here. Included in those assets are a range of community facilities such as

- *A number of hostels and supported accommodation units.*
- *Daisy Street Neighbourhood Centre.*
- *The former Daisy Street Trinity Church building, owned by Queens Park Govanhill Parish Church and used by a number of local community organisations.*
- *The old school at 311 Calder Street, now used by a number of Islamic organisations.*
- *Dixon Halls.*
- *Forsyth House*
- *Govanhill Baths.*
- *Govanhill Library.*
- *Govanhill Workspaces.*
- *The Larkfield Centre on Inglefield Street.*
- *Samaritan House on Coplaw Street.*
- *Victoria Court, a small development of industrial units*
- *The Ark (formerly the Victoria Halls), a small converted church now a base for a number of Islamic organisations and a Barnardo's project for disabled BME individuals.*
