Information Management	A programme for drafting an Information Sharing Protocol for all 3rd party organisations with whom SPFO share information should commence. All parties should be required to sign these agreements.	Medium	31/03/2016	The data sharing agreements under 4 have stalled following the departure of the SPFO legal representative with a replacement not expected to be in post until later in the year when this will be progressed again. The development of an Information Sharing Protocol is considered to be best practice as the SPFO do not have a legislative requirement to have one in place.	31/03/2020
