Attending: C Jack (Clerk); A Waddell, for the Acting Executive Director of Land and Environmental Services; M Ward, for the Executive Director of Development and Regeneration Services; and V Bond (for the Chief Executive).

European Commission Horizon 2020 Project - RUGGEDISED update noted – Instruction to Acting Executive Director of Land and Environmental Services.

1 There was submitted a report by the Acting Executive Director of Land and Environmental Services regarding the EU Horizon 2020 funded Smart Cities & Communities project RUGGEDISED (Rotterdam, Umea & Glasgow: Generating Exemplar Demonstrations in Sustainable Energy Districts), advising

- (1) that in July 2016 the European Commission notified the consortium responsible for RUGGEDISED that the bid had been successful and that the project would commence on 1st November 2016;
- (2) that the project was led by Rotterdam and sought to develop innovative, sustainable energy districts in each of the Lighthouse cities (Rotterdam, Umea and Glasgow) and through the project Glasgow would focus on creating a Smart Corridor District that would be situated along a section in the city centre;
- (3) that the Smart Corridor District would address the challenges Glasgow faced from ageing infrastructure, fuel poverty and air pollution by integrating planned regeneration and development with Smart City capabilities;
- (4) of the overall objectives of the RUGGEDISED project and the high level deliverables linked to achieving those objectives by the Glasgow element of the 5-year project;
- (5) of the project's work packages, the budget and the current status of the project; and

- (6) of the SMART innovations of the smart solutions that were being developed and deployed in the project, as detailed in the Appendix to the report.

After consideration, the committee

- (a) noted the report and their support of the work of Land and Environmental Services in delivering the RUGGEDISED project; and
- (b) instructed the Acting Executive Director of Land and Environmental Services to provide a further update on progress of the project in 12 months.
