About the statistics within this report

The activity totals and other statistics quoted within this report are published in the interests of transparency and openness. They are provisional in nature and subject to change as a result of ongoing quality assurance and review. Because all statistics quoted are provisional there may be a difference in the period totals quoted in our reports after local publication which result from revisions or additions to the data in our systems. The Scottish Government publishes official statistics each year which allow for comparisons to be made over longer periods of time.

13. Glossary of Terms

Term - What it means

ADF

Accidental Dwelling Fire.

HFSV

Home Fire Safety Visit.

PDIR

Post Domestic Incident Response, a term used to indicate actions taken following attendance at a fire or other incident in the home. PDIRs include amongst things the offer of a free follow up home fire safety visit.

RTC

Road Traffic Collision.

Special Service

Calls to incidents which are not fires or false alarms such as RTCs, rescues, flooding, incidents involving hazardous materials or the provision of assistance to other agencies.

UFAS

Unwanted Fire Alarm Signals. When an automatic fire detection and alarm system is activated as a result of anything other than an actual fire the activation is classed as a false alarm. If an attendance is made to such an event by the Scottish Fire and Rescue Service, then the event is recorded as an UFAS incident.

UFAS Policy Change

In response to COVID, on the 6th May 2020, the SFRS decided to send 1 pump to UFAS premises that did not have their own Predetermined attendance (PDA).

As of 1st July 2023, the COVID interim 1 pump response was ended and a new UFAS policy was implemented.

The new policy is to call challenge all UFAS incidents with the intention of non-attendance. Hospitals, care homes, and sleeping risk premises are all exempt and receive either 2 pumps or their premise specific PDA.
