

Glasgow CO₂ emissions – Update noted etc.

7 There was submitted a report by the Executive Director of Neighbourhoods, Regeneration and Sustainability regarding Glasgow's CO₂ emissions, advising

- (1) that the Department for Energy Security and Net Zero (DESNZ), formerly the Department for Business, Energy and Industrial Strategy, released data on energy consumption and carbon emissions for local authorities annually, 2 years in arrears with the data available from DESNZ being updated due to changes in the carbon equivalent of energy generation each year and the changes backdated from its previous releases; and
- (2) of the updated carbon emissions for Glasgow based on the most recent data, covering the year 2021 together with an analysis and profile of those changes to Glasgow's CO₂ emissions in 2021, with comparisons against both baseline and the previous year's emissions, as detailed in the report.

After consideration, the committee noted the report and that it would be updated annually.
