Note: In 2013, level 3 equated to Access 3; level 4 General Standard Grade/Intermediate 1; level 5 Credit Standard Grade/Intermediate 2; level 6 Higher; level 7 Advanced Higher.

Education

Attainment

4.10 Table 13 provides details on the percentage of S4-S6 pupils achieving levels of educational achievement during 2011-13. The information provides an improving position in Glasgow as:

- in 2013, the overall attainment levels in Glasgow schools had improved in all nine categories compared to 2011 and in eight of the nine categories compared to 2012;
- the increase in attainment levels for S5 and S6 pupils in all categories was higher than the national increase;

The attainment position for S4-S6 pupils attending schools in the North West is mixed as:

- in the majority of the categories, less than half of the eight North West schools achieved an attainment level that was above the Glasgow level;
- in three North West schools, a higher percentage of pupils achieved above the Glasgow attainment average in all nine categories. The three schools are all located in the more affluent part of the North West. A higher percentage of pupils in two of the three schools achieved above the National attainment average in all nine categories;
- conversely, in four North West schools, the percentage of pupils was lower than the Glasgow attainment average in at least six of the nine categories. One school achieved less than the Glasgow attainment average in all nine categories.

School Leavers

Table 14a: School Leavers Destination Return 2012/13 by number and percentage (Initial Destination)

	Total Number of School Leavers	Higher Education (%)	Further Education (%)	Training (%)	Employment (%)	UE/Unknown (%)
Anderston / City	74	43.2	20.3	14.9	13.5	8.2
Canal	270	27.0	27.4	14.4	20.0	11.2
Drumchapel / Anniesland	291	28.9	25.1	14.4	20.6	11.0
Garscadden / Scotstounhill	261	30.7	27.2	9.2	15.3	17.6
Hillhead	97	47.4	26.8	7.2	12.4	6.2
Maryhill / Kelvin	228	31.6	25.9	13.2	19.7	9.6
Partick West	219	54.8	23.3	5.0	9.1	7.8
North West Glasgow	1,440	35.2	25.6	11.4	16.7	11.0

Rest of Glasgow	3,658	32.3	27.8	10.1	19.8	10.1
Glasgow City Total	5,098	33.1	27.2	10.4	18.9	9.6

Table 14b: School Leavers Destination Return 2012/13 by number and percentage (Follow Up Destination)

	Total Number of School Leavers	Initial Positive Destination (%)	Follow - Up Positive Destination (%)	Percentage point change between initial and follow up
Anderston / City	74	91.9	85.1	-6.4
Canal	270	88.8	83.3	-5.3
Drumchapel / Anniesland	291	89.0	83.8	-5.2
Garscadden / Scotstounhill	261	82.4	80.3	-2.1
Hillhead	97	93.8	90.6	-3.2
Maryhill / Kelvin	228	90.4	82.5	-7.9
Partick West	219	92.9	90.4	-2.5
North West Glasgow	1,440	89.0	84.4	-4.6
Rest of Glasgow	3,658	89.9	86.0	-3.6
Glasgow City Total	5,098	89.6	85.6	-4.0

4.11 Table 14a provides details relating to the destination of 2012/13 North West school leavers based on home address and Table 14b provides details relating to the nine month follow up destination of 2012/13 school leavers based on home address.

Tables 14a-b illustrate that

- there was a significant variation in the number of school leavers resident in the seven North West APs, ranging from 74 to 291. The number of school leavers does not correlate to the location of secondary schools;
- 89% (1,281) of the 2012/13 North West school leavers left school with an initial positive destination. This was an improvement on the level (87.3%) for North West 2011/12 school leavers but was slightly below the overall 2012/13 Glasgow level (89.6%);
- in six of the seven North West AP areas, more 2012/13 school leavers had employment as a destination than unemployment;
- the level of initial positive destinations within the North West varied from 82.4% (Garscadden/Scotstounhill) to 93.8% (Hillhead). The Garscadden/Scotstounhill level was the lowest among the 21 MME wards in Glasgow. The level of variation within the North West becomes even more significant when analysis of the individual positive destinations is undertaken as follows:
 - A 2012/13 school leaver residing in the Partick West MME ward was more than twice as likely to be going to Higher Education than a school leaver from the Canal MME ward;

- for every hundred school leavers in a North West MME ward, at least twenty more school leavers from Partick West and Hillhead MME wards were going to Higher or Further Education than were going from the Drumchapel/ Anniesland or Canal MME wards;
 - if you excluded “Training” as a positive destination, there is a clear difference in the percentage of school leavers from Partick West (87.9%) and Hillhead (86.6%) MME wards going to a positive destination than in the other five North West MME wards (73.2% - 77.2%).
- The level of positive destinations drops to by 4.6 percentage points to 84.4% at the nine month follow up with the North West experiencing a greater reduction in the nine months than in the rest of Glasgow;
 - at the follow up stage, there was a drop in the level of positive destinations across all North West MME Wards with the North West level of positive destinations varying from 80.3% (Garscadden/Scotstounhill) to 90.6% (Hillhead). Langside and Springburn were the only Glasgow MME Wards where more 2012/13 school leavers were in a positive destination at the follow up stage than at the initial stage;
 - at the follow up stage, school leavers from Hillhead and Partick are at least 5 percentage points more likely to be in a positive destination than school leavers from any other North West MME wards. It should be noted that the four North West MME wards that had the highest percentage of the initial positive destination being “Training” were the four MME wards that experienced the greatest drop off in positive destinations in the nine months between the initial and follow up stage.

Table 15: 2013/14 School Leavers Destination Return (Initial Destination)

School	Total Leavers	Higher Education ¹ (%)	Further Education (%)	Training (%)	Employment (%)	Other Positive (%)	UE/Unkown (%0	Positive (%)	Percentage point change on % positive from 2012/13
Cleveden Secondary School	165	44.8	22.4	3.6	18.2	3.0	7.9	92.1	+1.0
Drumchapel High School	97	8.2	29.9	16.5	22.7	1.0	21.6	78.4	-5.4

¹ **Higher Education:** This category includes all leavers who have entered University to study at degree level, or an FE/HE college to study at HNC/HND level. Leavers with a deferred, unconditional place in higher education have also been included in this category. **Further Education:** This category includes all leavers who are studying at a non-advanced level and are not on a school roll e.g. National Qualifications, Access courses, portfolio preparation, pre-vocational courses or Highers or A Levels. **Training:** This category includes leavers who are on a training course and in receipt of an allowance. This includes those participating in the SDS funded Employability programmes. It also includes those participating in placements through the community jobs fund. In addition, leavers who are in receipt of an allowance and the programme they are participating in, is not funded by SDS e.g. vocational programmes funded by local authorities or third sector organisations. **Employment:** This category includes leavers who are employed and are in receipt of payment from their employers. It includes those undertaking formal training whilst in employment funded through modern apprenticeships. It also includes those who are Self Employed and those working on a part-time basis (less than 16 hours) who regard this employment as their main destination, irrespective of the hours worked. **Other Positive** includes leavers who are undertaking voluntary work and leavers who have signed up to an Activity Agreement.

Hillhead High School	118	42.4	23.7	6.8	12.7	9.3	5.1	94.9	-0.9

Source: Community Planning Partnership Report - Skills Development Scotland December 2014. The information is based on the snapshot date of Monday 6th October 2014.

4.12 Table 15 provides the initial destination returns for 2013/14 school leavers based on school rather than home address and illustrates that

- the percentage of school leavers in Glasgow entering a positive destination is 89.7%, a rise of 0.5 percentage points in comparison to 2012/13. This is 2.6pp below the national average of 92.3%;
- the percentage of school leavers in North West Glasgow entering a positive destination is 90.3%, which is higher than the rest of Glasgow and is a rise of 1.3 percentage points in comparison to 2012/13;
- five out of the eight North West secondary schools had a level of positive outcome destinations above the Glasgow average level. Three North West secondary schools achieved a positive outcome destination level above the Scottish average;
- five North West secondary schools increased the percentage of school leavers with a positive destination compared to 2012/13 with Knightswood Secondary improving by 7.1 percentage points;
- the level of initial positive destinations within the North West varied from 78.4% (Drumchapel High School - 2nd lowest level among the 30 secondary schools in Glasgow) to 94.9% (Hillhead Hill School – 4th highest level in Glasgow). The variation is even more marked when looking at individual destination categories e.g. more than half the school leavers from Hyndland Secondary School went onto Higher Education compared to less than one in twelve school leavers from Drumchapel High.
